Ladies and Gentlemen,

This message is to clarify Ecology's expectations of the deliverables to be submitted to meet the M-20-42A and M-20-43A milestones.

Signed certifications, as specified in WAC 173-303-810(13), that the units were never used to treat, store, or dispose of dangerous waste, except as provided in WAC 173-303-200 or 173-303-802, are expected to be submitted by September 30, 1995. Accompanying the certifications should be documents similar to those prepared pursuant to M-20-45, including summaries of activities conducted in the regulated areas.

In keeping with our agreements to date, submittal of such procedural closure packages will satisfy the requirements of these Tri-Party Agreement milestones. However, this decision may be changed in future closures of this nature.

If you have any questions feel free to call me at 736-3019.

Jeanne Wallace
Unit Manager
